SINGLE AND DUAL OUTPUT ROTARY POSITION SENSOR

Introduction

The 9360 Series rotary sensor is a non-contacting Hall effect device with up to 360° of rotation and single or dual outputs. This rugged design is ideally suited for continuous rotation applications where reliability and durability are a priority. The sensor provides absolute position at power on and offers two completely isolated outputs. The packaging is similar to other BEI® devices and meets the severe durability requirements that are typical in off-highway and agriculture environments. This combination of magnet, sensor and sealed packaging offers excellent temperature stability and corrosion resistance. The sensor can be configured for Analog (voltage) or PWM output. These programmability features are configured at the factory and allow for greater flexibility in creating custom limited electrical angle outputs (i.e. ±20° degrees for full scale) with short turnaround times.

Fully sealed, (meeting and/or exceeding IP67 and IP69K standards) the 9360 is resistant to contamination and moisture. An integrally molded 6-pin Metri-Pack or Ampseal connector makes a sealed connection with industry standard mating connectors. The 2 outputs are available in either inverse option (9360) or direct option (9362).

Features

- Fully programmable: The standard sensor provides 15°-360° electrical degrees. Multiple outputs with limited electrical angles up to 360° and temperature compensation are also available
- Compression molded Neodymium magnets: Provide excellent temperature stability and corrosion resistance
- Ratiometric analog output or PWM output: Reduced sensitivity to voltage changes
- Factory programming through connector: Allows for quick turn-around on custom electrical angles
- Sealed construction: IP66 / IP67, 6-pin I/O interface to Packard Electric Metri-Pack Pull-to-Seat 150.2 Series P/N 12162261 or P/N 12162260 connector; Ampseal 16 - 6 position, P/N 776433-1sealed receptacle housings 2-Row
- Temperature range: -40° to +125°C standard
- Operating life: 35M cycles; Over one million cycles at 1kg side load
